

VARIOUS.

TOMATO WINE.—The following recipe for making an excellent article of tomato wine, is communicated to an agricultural paper by a gentleman who tried it successfully last season:

"To a bushel of sound ripe tomatoes cut, add four gallons of water. Let the mixture stand in an open tub three days, stirring two or three times each day; then strain through a sieve. To each gallon of the clear liquid add three pounds of brown sugar, stir until the sugar is dissolved, after which it is to be distributed for three days, except to take the strain as it rises. Then strain the liquid through muslin or flannel bags, and put it in a cask, filled to the top of the bung holes. There must be a surplus of the liquor to replace what fermentation throws off, as the cask must be kept full. As soon as fermentation becomes feeble, which is usually at the end of a week from the time the cask is filled, dissolve half an ounce best lainglass in a portion of the liquor, put it in the cask and bung tightly. Half an ounce of lainglass is sufficient for ten gallons. Place the cask in the cellar, with the spigot in so that the wine can be drawn off for bottling without disturbing its sediment. The proper time for bottling is the following: May. The wine is good when a year old, but continues to improve for several years. Two and a half bushels of tomatoes will make ten gallons of excellent wine."

HOW TO CURE A FELON.—As we often see friends suffering with these very troublesome things, we publish the following cure for them, which we have heard highly recommended:

As soon as the part begins to swell, get the structure of lobelia and wrap the part affected with cloth saturated thoroughly with tincture, and the felon is dead. An old physician tells he has known it to cure in a score of cases, and it never fails if applied in season.—*Pennsylvania Index.*

An exchange gives the following sound advice, under the heading "A Word to Apprentices": "Stick to your trade, boys, and learn how to work if you wish to be independent. There is no more profitable sight than a half trained mechanic applying for work. He is always at the foot of a hill, laboring he may; unless he has become perfect in his trade before he attains the years of maturity, he can calculate on poverty as his portion, with a good deal of safety. Parents, if you wish well of your children, urge them to learn their trades properly."

The Newburyport Herald understands that the leading Masons of Massachusetts are about to invite their most influential brethren of the South to visit them and partake of their hospitalities, that the members of past stills may be brought out and the Union confidence where it should, in the individual heart.

The Blair are punning their Republican friends without mercy. Montgomery is hard on Secretary Seward, because of his Mexican policy, and General Grant shows no quarters to Chase, Stanford and Holt.

Shenandoah Valley Lands!
REAL ESTATE AGENCY
TOWN AND COUNTRY PROPERTIES
FOR SALE.

We have now for sale very desirable Farms, located in the counties of Augusta, Rockingham, Shenandoah, Page, Pendleton and Hardy. The Farms contain from 20 to 500 Acres, and are privileged to sub-divide large tracts of land as desired by the purchaser. Many of the Farms are within an easy drive of the county town in which they are located, thereby securing an early market. The improvements are excellent, good, and on the farms are springs and running streams of water, as well as plenty of the very best timber. It is sufficient recommendation for these lands to say that they lie in the very heart of the Shenandoah Valley, which has a world-wide reputation for fertility of soil and beauty of scenery.

Soluble Pacific Guano.

JOHN S. REESE & CO., SOLE AGENTS FOR THE PACIFIC GUANO COMPANY, 71 South Street, Baltimore. The Soluble Pacific Guano resembles Peruvian Guano in appearance, odor, and composition. The value of all Guanos and Super Phosphates of Lime of whatever name, does not lie in the fact that it contains less Ammonia, but in the fact that it contains almost double as much Soluble and Bone Phosphate of Lime. This difference makes it a durable fertilizer, with all the activity of Peruvian Guano. Although the price of this Guano is only one-half the price of Peruvian, and is not higher than the Super Phosphates of Lime, yet it contains, as is proven by analysis and inspection, vastly more of ammonia, soluble, and Bone Phosphate, than is found in the best of them. Hence its economy and intrinsic value must render it an object of great interest to farmers generally.

We wish farmers to take especial notice, that the conditions upon which we have the agency of this Guano are that every cargo is regularly inspected and analyzed by Dr. F. L. Farnestock, whose authority in such matters is paramount.

This arrangement affords us and consumers a protection not had in the purchase of fertilizers generally. It must also be noticed that the Phosphates of this Guano are not mineral, but earthy Phosphates, which is greatly to its advantage.

The following is a summary of analysis of last cargo: Moisture, 10 per cent. Organic Combustible Matter, 29.71 " Earthy Matter, 50.28 " Yielding Ammonia, 3.40 per cent. Soluble Phosphate of Lime, 17.07 " Bone Phosphate of Lime, 24.22 " For sale by

MCCURDY & DIEHL, General Produce Dealers, July 10, 1865. 4m Gettysburg.

Bone Flour, UNADULTERATED.
MANUFACTURED BY THE BOSTON MILLING AND MANUFACTURING COMPANY. The value of unadulterated Bone Flour is well known. When reduced to the condition of Flour, it is as active as if dissolved in water, and is far better, because it retains all its Phosphates. Its superiority over the common Bone Flour is two-fold or more. It is a consummation sought for in vain for the last half century, and is destined to give a new value to Bone as a fertilizer, and work a revolution in its use. The BONE FLOUR is made only by the above Company, and is branded with their trade mark, which is the guarantee of its genuineness.
